Curt,

Can you call Mike and arrange a meeting? I am thinking that we need to keep it small, maybe between Mike, Kent, and you.

David

Subject: RE: RD Monitoring Data

Yes, this is a perfect opportunity to not only talk about how we think its important for further capture of groundwater down by BTC and BRW, but also the conversation about taking Parrot water out of the system and optimizing the BPSOU subdrain. I am a little confused though, about why Mike is asking about data interpretations along "upper" SBC? Regardless, please set up a phone call and I would even like to talk to Mike about our Parrot White Paper, local sources are still contaminating groundwater and loading sediment, optimization of subdrain etc. We also might receive some great insight from Mike and come up with some hybrid solutions. Sorry to be so long winded but, I have been wanting you guys to have this conversation with Mike for some time now.

Please keep me posted.

Thanks,

Nikia Greene

Nikia,

Is this something that you want us to coordinate with Mike on? We were thinking that Curt should also be in the room.

David

Subject: RD Monitoring Data

Good afternoon Kent!

Loren asked me to contact you regarding some of your data interpretations along upper Silver Bow Creek. If this is ok with Nikia and David, what do you think about sitting down next week on your observations? I am open any day except Friday.
